

# Stainless Steel Filters

## Steam and Sterile Filtration

Whether you're a micro-brewery, a regional dairy or working on a production line canning baked beans – odds on you will need Stainless Steel Compressed Air Filtration.

DS Filtration is a recognized Australian distributor of the Ultra-Air range including the P-EG stainless steel filter housings, P-GS steam and P-SRF sterile elements. When you purchase Ultra-Air your guaranteed quality, reliability and efficiency.

The P-EG filter housing (pictured to the left) is designed for the filtration of compressed air and gases in industrial applications. Both steam and sterile filtration utilize the P-EG Stainless steel housing, they differentiate in the types of filter elements.

The P-EG is available in 8 different sizes for operating volumes from 60 to 23.040Nm<sup>3</sup>/h related to 7 bar.

The P-GS is for steam filtration:

- \*Removes particles from gases, liquids and steam.
- \*Made from re-generable weld-less sintered steel piping.
- \*Long service life and re-generable by ultrasonic cleaning.

The P-SRF is for sterile filtration:

- \*Is a non-fibre releasing element with stainless steel inner and outer guards as well as end caps.
- \*Biologically and chemically inert.
- \*All components meet the FDA requirements for the contact with food in accordance with federal regulations.
